**Subject: Proposal for Professional Engineering Services
Hickory Creek and East Interceptor Multi-Sensor Inspection
Program Management**

Dear Mr. Dean:

RJN Group, Inc. (RJN) is pleased to submit this proposal to the City of Joliet (City) for contract management and field inspection services on the Hickory Creek and East Interceptor Multi-Sensor Inspection Program.

Key Project Goals and Objectives

The City of Joliet is completing a Multi-Sensor Inspection program of the Hickory Creek and East Interceptor sewers, in order to provide inspections needed to assess the condition of aging interceptor sewers.

In May 2026, RJN Group, Inc. assisted the City of Joliet in preparing contract documents for multi-sensor inspection, while making sure the contract had the necessary language, exhibits and requirements for a multi-sensor inspection program spanning multiple large diameter interceptor sewers.

The program includes multi-sensor inspection (MSI) in the City of Joliet, covering approximately **28,700 linear feet of sanitary sewer**, primarily made of reinforced concrete (RCP), ranging from 24" to 60" in diameter. Additionally, the contract with the MSI contractor includes an Alternate Bid for **100 hours of on-call labor**.

Because a significant part of the City's current asset assessment and future programs are reliant on this information, getting quality usable data is important, as it will help to direct future maintenance activities and rehabilitation projects.

On-site visits and program management are needed to ensure the following:

- The terms of the agreement are being met;
- Invoicing and records are reported accurately;
- The work is performed properly; and
- Deficiencies in the work are quickly addressed.

Assuring Quality and Safety

Quality Assurance/Quality Control

Our design processes adhere to stringent Quality Assurance and Quality Control (QA/QC) protocols to ensure the highest standards of accuracy and reliability. We implement a multi-tiered review system, where each design phase undergoes thorough checks by experienced engineers and project managers. This includes peer reviews and adherence to industry standards and regulatory requirements.

Clarity®

Using Clarity®, RJN's in-house built data management and reporting software, the City will have access to fully transparent CCTV data.

Safety

As an employee-owned firm, RJN's commitment to the safety of our employees, City staff, and the public is paramount. RJN demonstrates that commitment to safety in our internally developed and audited safety program where our goal is to have all field staff, engineers, and project managers "RJN Safety Certified." Every project follows RJN's health and safety guidelines when completing any field work.

Price and Schedule Summary

RJN will invoice for this project monthly on a Time and Material Basis for a total not-to-exceed fee of **\$56,400** as outlined in Exhibit B. RJN is ready to begin the project immediately upon an agreement with the City, and the multi-sensor inspection is expected to be completed by December 31, 2026. Complete Scope of Services, Pricing, and Schedules are provided in the following exhibits:
