7. Database Access Provisions

- a. In consideration for using the SQL Database format of RTA, RTA is offering this section as a Letter of Understanding concerning the DATA and issues that may arise in connection with an open database system. If COMPANY has requested direct access to the database, be it understood that:
- b. To provide direct connection to the COMPANY SQL database, making it available for connection from SQL Management Studio, Crystal Reports, or integrating with other SQL-aware applications, RTA must place the database on a SQL database server that is connected to the internet. The SQL server connection string listens on a non-standard port and is protected by standard SQL Server security features. A user account specific to COMPANY will be provided and is used solely to access the database. For additional security, a firewall prevents anonymous entities from connecting to the database server. COMPANY will need to provide RTA with the public IP address(es) from which COMPANY will be connecting to the database so that we may allow the connection.
- c. All database connections are read only.

- d. COMPANY is hereby notified that if a data element in a table is deemed to be invalid, RTA will use all diligence to determine the nature of the source of the invalidity. If source of the error is determined to be from an outside query operation or user modification to the data, RTA can assist in correcting the data at our standard professional services rate of \$250/hour.
- e. RTA is requesting that write access to the data be limited (e.g., Not available to non-technical users) to only certain users of the Service.
- f. RTA recognizes the value of using database systems to enhance data availability, access, and reporting. RTA Tech support will support the normal database access questions (field definitions, linkage relationships) but cannot assist in writing queries, forms, or other data-access objects and methods without a formal engagement for those services.
- g. COMPANY will specify static IP addresses that will be connecting to the RTA database by emailing Company Name and IP address(es) to support@rtafleet.com. Connections from all other addresses outside the Service will be blocked.
